Java | C | OOPS | CSS | HTML | Bootstrap | JavaScript | ES6 | EJS | Typescript | REST API | SQL |
MongoDB | Express JS | React JS | Node JS | Git | Github | TCP/IP Fundamentals | Redux

PROJECTS

Full Stack Marketplace Platform ✎
- **Developed** a comprehensive marketplace platform using the **MERN** stack, enabling seamless listing, exploration, and booking of accommodations.
- **Integrated** AI-powered recommendation features to enhance user engagement and improve the overall browsing experience.
- **Optimized** backend APIs to improve data retrieval efficiency, resulting in faster load times and smoother user interactions.

User-Powered Q&A Platform ✎
- **Engineered** a dynamic Q&A platform with JavaScript, CSS, and EJS, allowing users to post, edit, and manage discussions with ease.
- **Implemented** intuitive UI components and dynamic content rendering to enhance user interaction and accessibility.

Weather Widget ✎
- **Developed** a weather widget with React that supports 10,000+ location queries daily, delivering real-time data updates.
- **Refined** the UI/UX design to provide a visually appealing and interactive experience.

EJS-based Message Board ✎
- **Built** a real-time messaging platform using EJS, Express.js, and MongoDB, supporting full **CRUD** operations for user-generated content.
- **Refactored** front-end components to ensure a responsive design, providing a consistent experience across devices.
